Cristian Ioniță

Web Developer

Experience

Entry-Level Web Developer - Freelancer Seasonal Projects

2023 - Present

Web Developer (Python/Django)

- Developed robust, scalable web applications using Django/Flask frameworks.
- Focused on backend development, including database management with SQL.
- Integrated various services and managed user interactions and database operations.
- Technologies: Django, Flask, HTML, SQL/MySQL.

Backend Developer

- Built and managed server-side components for web applications using Django and Flask.
- Developed and maintained RESTful APIs, optimized performance, and ensured security.
- Managed authentication, routing, and database interactions.
- Technologies: Python, Django, Flask, SQL, MySQL.

Teamwork & Version Control

- Collaborated with developers using Git for version control and workflow management.
- Participated in code reviews, providing constructive feedback to improve code quality.

Continuous Learning & Adaptation

- Proactively updated skills by learning new libraries, frameworks, and technologies.
- Gained experience with AI, data science, and machine learning tools such as TensorFlow and scikit-learn.

Frameworks & Libraries

- Utilized and adapted frameworks like Django, Flask, and FastAPI for specific project requirements.
- Worked with libraries focused on automation, data analysis, and machine learning.

Certifications

- Introduction to Python Programming - BIT.net
- First Aid Course

Skills

- Problem-Solving
- Teamwork
- Email management
- Document management
- Long-term customer retention
- Organizational Skills
- Communication Skills
- Attention to Detail
- Multitasking Abilities
- HTML
- Flask & Django
- SQL & MySQL
- Data Analysis
- Microsoft Office
